CORTECH DEVELOPMENTS AND BOSCH FORUM OVERVIEW

WEDNESDAY 25TH SEPTEMBER | BROOK HOUSE FARM | 9:30 AM - 2:30 PM

FEATURING GUEST SPEAKER PETE BARTLETT (FYEAR SOLUTIONS)

THE AIM OF THE DAY

Cortech Developments' key focus as a business is to assist today's practising professionals to mitigate risk by dint of employing smarter interoperability. The company's recent Forum – for which Risk Xtra served as the Official Media Partner – brought together end users in order for them to share experiences, widen their scope of knowledge and learn the latest techniques and guidance, as well as witness live fire and integration demonstrations.

The forum jointly hosted with BOSCH, was held at Cortech Developments' head office near Knutsford in Cheshire on Wednesday 25th September and ran from 9.30am through until 2.30pm. The event was designed to challenge attending delegates to consider how they might use their existing systems and new technology alike to deliver greater benefits and value for their organisations as well as looking at what does the future hold for CCTV intelligence and fire integration.

A further objective on the day was for delegates to share experiences among their peers, widen their scope of knowledge and learn about Best Practice with a view to maximising their value out of Datalog. Datalog is a modular software suite that operates as a single or multi-user GUI, providing local and remote site monitoring and control of building, fire, security and energy systems. From the end user's perspective, Datalog assists in reducing risk and cost while at the same time maximising efficiencies, situational awareness and accountability.

FIRE DETECTION AND INTEGRATION

One of the presenters on the day was Pete Bartlett, who has over 35 years' experience in building services and fire engineering, and has been involved in the deployment of a number of complex projects in multiple sectors regarding fully integrated solutions. With a history of specialising in the design and installation of commercial and industrial fire detection.

Pete is technically minded and provides fire and security consultancy services including, strategic review and advice relating to existing or proposed fire alarm and security systems, maintenance and service agreements, Public Sector and Private Sector new and renewal tender management

advice and support, as well as asset validation and compliance with servicing standards and recommendations.

His presentation on the day focused on the FIA's journey to raise competency within the Fire Industry, integration of fire systems and the benefits as well as the challenges around false alarms and the risks associated with these false alarms.

Pete concluded his presentation with the benefits of video flame & video smoke detection.

FEEDBACK FROM DELEGATES

Delegates gave the quality of the forum content an average rating of 4.44, scoring the workshops/activities with an average rating of 4.25. The added value aspect of the event scored an average of 4.44 with the maximum mark being 5.

“THE EVENT WAS GREAT! I CERTAINLY GOT WHAT I WANTED FROM THE DAY. IT WAS GOOD TO NETWORK WITH OTHER COLLEAGUES IN THE INDUSTRY AND WATER SECTOR TOO. ALL GOOD FROM ME. PLEASE LET ME KNOW OF ANY FUTURE EVENTS”

“I WOULD LIKE TO SAY THANK YOU FOR THE INTERESTING DAY THAT WE HAD AT CORTECH. SO MUCH SO WE WOULD LIKE TO ARRANGE A VISIT WITH YOURSELVES AND OURSELVES TO SEE HOW WE CAN INTEGRATE WITH OUR CURRENT SYSTEMS THAT WE USE ON OUR SITES”
