

# Cortech Developments

## INTRODUCTION

Our Learning and Development courses cater to all levels of Datalog users, from operators through to managers. These interactive, virtual, hands-on courses focus on providing delegates with the insights they need to get the most from their system.

Allowing Cortech to provide end user training on behalf of our Technical Partners ensures the very latest knowledge transfer and will help our users to get the best return on their investment.

## BENEFITS OF End User TRAINING

Understanding the full features within the software can address common problems and unlock additional benefits.

Empowering operators by providing them with the correct knowledge and skills to match their abilities. All these attributes are required for an effective performance.

Increased productivity, our training sessions provide users with the confidence to use Datalog more effectively and understand how it can work for them.

Ensuring that the end user is knowledgeable about Datalog's full capabilities, enabling them to get the most from their system, maximising return on investment.

Engagement with users of Datalog and Partners provides the opportunity for a better understanding of the user's requirements and the chance to obtain first hand feedback, which is valuable in looking at the future development of Datalog.

Delegates will be getting the latest and most up to date training direct from the manufacturer of the software, ensuring they can stay current with the latest updates, features, and best practice. As well as discovering and keeping pace with new 3rd party technologies.

## COURSE INFORMATION

### Datalog Operators Training

This half-day virtual training course will provide operators with the knowledge they need to be able to comfortably operate Datalog. By providing them with hands on experience, they will gain an insight of the key functions of Datalog as well as features that will enhance operator efficiency.

### Datalog Managers Training

This one-day, virtual training course will provide managers with a general overview of the key features of Datalog while highlighting key operational enhanced features to help manage risk and address specific site issues. They will be shown functions of Datalog that will help maximise operational effectivities, such as audit trails, user levels and reports.

## HOW TO BOOK

For more information, please contact our Sales Department or book via one of our approved Cortech Developments Technical Partners.
